SUMMARY

Engineer and founder with experience working in software development, AI, AR/VR, ecommerce, and geospatial technology. Fast-learner, adaptable, analytical, and detail oriented self-starter with a passion for learning. Able to prioritize effectively and accomplish tasks with creativity while staying calm under pressure.

SKILLS

Technical

- AI, Unity C#, Python, C++, AR/VR, ecommerce
- AI tools (Amazon Bedrock, VSCode Copilot, PartyRock, Claude, ChatGPT, etc.)
- Experience with GIS, mapping APIs (Mapbox, Google Map)
- Familiar with Agile, Git, PlasticSCM, Jira, Perforce

EDUCATION

Aug 2026 – Oct 2026 **Udacity**
Nanodegree - AWS AI Programmer (Full Scholarship)

Aug 2016 - May 2018 **California State University, Fullerton**
Master of Science - Software Engineering (MSE) - GPA 3.83

Sep 2013 - Jun 2015 **University of California, Santa Barbara**
Bachelor's Degree - Geographic Information Science (GIS) - GPA 3.66

EXPERIENCE

Jun 2024 - May 2026 **Crazy Green Earth** Remote (US)
Founder & Developer

- Develop and maintain ecommerce website crazygreenearth.com(retired) which supplies environmentally-friendly, sustainable, and biodegradable products that reduce plastic waste
- Work with domestic and foreign suppliers to purchase inventory and packaging
- Provide direct customer support for technical and non-technical issues

Oct 2022 - May 2024 **Raytheon** Remote (US)
Principal Software Engineer

- Develop 3D military training application using Unity and Unreal game engines
- Implement new software features per customers' requirements
- Document coding standards, requirements, source control workflow, developer guide, etc.

Mar 2021 - Aug 2022 **HAVIK** Remote (US)
Software Engineer

- Develop AR & VR simulations for military training using Unity game engine
- Implement new features including networking, voice chat, user login system, and gameplay
- Create prototypes for experimental features for Windows and Android

Jul 2019 - May 2020 **NextVR** (startup acquired by Apple 05/2020) Newport Beach, CA

Rapid Prototype Engineer

- Use Swift and AVFoundation to create an iOS application that synchronizes multiple iPhone cameras for stereoscopic/VR capture
- Integrate new functionalities into in-house game engine for VR using C++
- Use Unity game engine to develop prototypes for AR/VR platforms

Dec 2018 - Jun 2019 **Motion Scientific** Greater Los Angeles Area

R&D Software Engineer: Augmented Reality

- Start-up funded by the National Science Foundation (Phase 1)
- Research and develop an augmented reality (AR) application for physical rehabilitation
- Utilize Unity, AI and other technologies for Android and iOS development

Dec 2015 - Jan 2017 **City of San Jose** San Jose, CA

Geographic Systems Specialist II

- Build web maps using Google Maps API, Google Apps Engine, Carto API, and JavaScript
- Migrate enterprise GIS database, create public facing GIS REST services

PROJECTS

Minecraft AI Wizard

- An AI web game for the browser made with Unity engine and Python.
- Utilizes the meta-llama/Llama-3.1-8B-Instruct LLM model for NPC chatting feature, Minecraft wiki as a knowledge base, and Opensearch for indexing and vector searching.
- Gameplay includes exploring the surroundings and asking the AI Wizard Minecraft questions.
- Project demo link: https://minecraft-ai-wizard.onrender.com/

Todo List App

- Todo application that allows creating, editing, deleting, and resolving tasks
- Created using Claude AI assisant, Python, Django, and Docker
- Project demo link: https://nhibchung-todolistproject.hf.space

Fantasy Islands Exploration Game

- An exploration game created with Unreal 5 game engine
- Gameplay includes exploring floating islands and getting past obstacles such as moving platforms, shooting barrels, rolling boulders, and scaling castle walls
- Project demo link: https://nhibchung.github.io/project/fantasyIslands/fantasyIslands.html

Oculus Rift VR Exploration Game

- Immersive VR game level created with Unity3D in C#
- Uses the Oculus Avatar SDK hand features for Touch to interact with the environment
- Project link: http://nhibchung.github.io/project/oculusExploration/oculusExploration.html

VR Labyrinth for Android Google Cardboard

- VR game created with Unity3D in C#
- Project link: http://nhibchung.github.io/project/vrLabyrinth/vrLabyrinth.html
