SUMMARY

Engineer and founder with experience working in ecommerce, software development, AR/VR, and geospatial technology. Fast-learner, adaptable, analytical, and detail oriented self-starter with a passion for learning. Able to prioritize effectively and accomplish tasks with creativity while staying calm under pressure.

SKILLS

Technical

- Working knowledge of Unity C#, C++, AR/VR, ecommerce website
- Experience with GIS, mapping APIs (Mapbox, Google Map)
- Familiar with Agile, Scrum, Git, PlasticSCM, Jira, Perforce

EDUCATION

Aug 2016 - May 2018 **California State University, Fullerton** Fullerton, CA

Master of Science

Software Engineering (MSE) - GPA 3.83

Sep 2013 - Jun 2015 **University of California, Santa Barbara** Santa Barbara, CA

Bachelor's Degree

Geography - Geographic Information Science (GIS) - GPA 3.66

EXPERIENCE

Jun 2024 - Present **Crazy Green Earth** Remote (US)

Founder & Business Owner

- Develop and maintain ecommerce website (https://crazygreenearth.com) which supplies environmentally-friendly, sustainable, and biodegradable products that reduce plastic waste
- Work with domestic and foreign suppliers to purchase inventory and packaging
- Manage product shipments and online marketing campaigns
- Provide direct customer support for technical and non-technical issues

Oct 2022 - May 2024 **Raytheon** Remote (US)

Principal Software Engineer

- Develop military training application using Unity and Unreal game engines
- Implement new software features per customers' requirements
- Analyze project codebase and help come up with a new networking architecture
- Document team coding standards, project requirements, source control workflow, new developer guide, etc.

Mar 2021 - Aug 2022 **HAVIK** Remote (US)

Software Engineer

- Develop AR & VR simulations for military training using Unity game engine
- Implement new features including networking, voice chat, user login system, and gameplay
- Create prototypes for experimental features for Windows and Android

Jul 2019 - May 2020 **NextVR** (startup acquired by Apple 05/2020) Newport Beach, CA

Rapid Prototype Engineer

- Use Swift and AVFoundation to create an iOS application that synchronizes multiple iPhone cameras for stereoscopic/VR capture
- Integrate new functionalities into in-house game engine for VR using C++
- Use Unity game engine to develop prototypes for AR/VR platforms

Dec 2018 - Jun 2019 **Motion Scientific** Greater Los Angeles Area

R&D Software Engineer: Augmented Reality

- Start-up funded by the National Science Foundation (Phase 1)
- Research and develop an augmented reality (AR) application for physical rehabilitation
- Utilize Unity, AI and other technologies for Android and iOS development

Dec 2015 - Jan 2017 **City of San Jose** San Jose, CA

Geographic Systems Specialist II

- Build web maps using Google Maps API, Google Apps Engine, Carto API, and JavaScript
- Help migrate enterprise GIS database, create and publish public facing GIS REST services for basemaps, utilities, and aerial imagery

PROJECTS

Fantasy Islands Exploration Game

- An exploration game created with Unreal 5 game engine
- Gameplay includes exploring floating islands and getting past obstacles such as moving platforms, shooting barrels, rolling boulders, and scaling castle walls
- Project demo link: https://nhibchung.github.io/project/fantasyIslands/fantasyIslands.html

Matching Cards Game

- A simple card game created with Unity for WebGL that can be played in a browser
- Check out the project on my Github page
- Project demo link: https://nhibchung.github.io/project/matchingCards/index.html

Helicopter Simulation Oculus VR Game

- Created with Unity3D, C#, and WRLD SDK(3D maps based on real-world coordinates)
- Gameplay includes piloting the helicopter to waypoints following a navigational arrows
- Project link: https://nhibchung.github.io/project/helicopterVR/helicopterVR.html

Poke-A-Mole Augmented Reality(AR) Game

- AR game created with Unity3D, C#, and Vuforia AR Groundplane
- Project link: https://nhibchung.github.io/project/pokeAMoleAR/pokeAMoleAR.html

Oculus Rift VR Exploration Game

- Immersive VR game level created with Unity3D in C#
- Uses the Oculus Avatar SDK hand features for Touch to interact with the environment
- Project link: http://nhibchung.github.io/project/oculusExploration/oculusExploration.html

VR Labyrinth for Android Google Cardboard – based on a Udacity project

- VR game created with Unity3D in C#
- Project link: http://nhibchung.github.io/project/vrLabyrinth/vrLabyrinth.html
