Email: nhibchung@gmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience building commercial software, simulation applications, and R&D solutions. Focused on Applied AI and LLM application development, with hands-on experience integrating language models, implementing BM25-based knowledge retrieval, and developing AI-powered applications. Strong programming background in Python, C++, and C#, complemented by experience in software architecture, technical leadership, and full-cycle product development.

TECHNICAL SKILLS

- **AI & Generative AI:** LLM Application Development, Generative AI Integration, BM25 Retrieval, OpenSearch, RAG Concepts, Prompt Engineering
- **AI Tools:** OpenAI, Anthropic, Groq, GitHub Copilot, Amazon Bedrock, LangChain
- **Programming Languages:** Python, C#, C++, JavaScript
- **Frameworks & Tools:** Unity, Unreal Engine 5, Docker, Git, Perforce, Plastic SCM, Jira
- **Software Engineering:** Technical Leadership, System Architecture, Networking Architecture, Requirements Analysis, Agile Development

PROFESSIONAL EXPERIENCE

CRAZY GREEN EARTH | Founder & Lead Developer
June 2024 – May 2026 | Remote

- Founded and operated an e-commerce business focused on sustainable products, owning website development, supplier sourcing, inventory, and packaging decisions.
- Managed technical operations, website maintenance, and customer support, resolving technical and operational issues.

RAYTHEON | Principal Software Engineer
October 2022 – May 2024 | Remote

- Led an engineering team developing 3D military training and simulation applications using Unity and Unreal Engine.
- Designed and implemented a new networking architecture to support application communication and multiplayer functionality.
- Translated customer requirements into technical designs and implemented complex software features.
- Established and maintained coding standards, requirements documentation, source control workflows, and developer guidelines.

HAVIK | Software Engineer
March 2021 – August 2022 | Remote

- Developed AR/VR training simulations using Unity and C#.
- Implemented multiplayer networking, voice communication, authentication, and interactive gameplay systems.
- Prototyped experimental features for Windows and Android applications.

NEXTVR (ACQUIRED BY APPLE) | Rapid Prototype Engineer
July 2019 – May 2020

- Developed an iOS application using Swift and AVFoundation to synchronize multiple iPhone cameras for stereoscopic VR video capture.
- Integrated functionality into an in-house C++ game engine and developed Unity prototypes for immersive experiences.

MOTION SCIENTIFIC | R&D Software Engineer – Augmented Reality
December 2018 – June 2019

- Developed a Unity-based augmented reality rehabilitation application as part of an NSF Phase I-funded R&D project.

SELECTED AI PROJECTS

See all projects

MINECRAFT AI WIZARD | Unity, Python, LLM Integration, BM25, Groq | Demo

- Developed a browser-based AI game featuring an LLM-powered NPC capable of answering questions about Minecraft.
- Implemented BM25-based information retrieval over Minecraft Wiki content hosted on Hugging Face to provide relevant context for AI-generated responses.
- Integrated the openai/gpt-oss-20b language model through Groq to power conversational interactions.

TODO LIST APPLICATION | Python, Django, Docker **|** Live demo

- Developed a task management web application supporting task creation, editing, deletion, and completion using Python, Django, and Docker.
- Explored AI-assisted software development tools, including GitHub Copilot, Claude, Cline, and Amazon Bedrock.

EDUCATION

California State University, Fullerton
Master of Science in Software Engineering | 2018 | GPA: 3.83
University of California, Santa Barbara
B.A. in Geographic Information Science | 2015 | GPA: 3.66
Udacity
AI Programmer Nanodegree | October 2026 | AWS-sponsored Full Scholarship
